ABSTRACT

In December 1973, questionnaires were sent to academic libraries of varying size to discover which book and materials selection aids were used in the library's acquisition process. Aids under consideration included book reviews in library journals, professional subject journals, and publisher's selection/promotional material. The highlights of the survey results are presented in tabular form, arranged first by size of respondent library--small, medium, or large--and secondly by subject speciality: social science, humanities, science, or generalist. Responses are presented in ranked order for the following variables: use of specific reviewing media (such as "Library Journal," "Kirkus," and "Choice"), reasons for nonuse of book reviews, use of unspecified subject journals, and use of selected publisher's materials. The following information on the use of book and material selection aids such as book reviews in library journals, professional subject journals, and publisher's selection/promotional material was compiled via a CLA Collection Development Chapter questionnaire which was circulated in the mail September - December, 1973. The results are presented here in tabular form for your convenience.

Organization is by two main categories: (I) Library type and (II) Subject.

- I. Three "types" of academic libraries (broken down by introductory information received with the questionnaire):
 - A. Small academic library.
 - 1. Book budget less than \$100,000.
 - 2. Collection size less than 500,000 volumes.
 - B. Medium academic library.
 - 1. Book budget between \$100,000 and \$500,000.
 - 2. Collection size between 500,000 and 1,000,000 volumes.
 - C. Large academic library.
 - 1. Book budget over \$500,000.
 - 2. Collection size over 1,000,000 volumes.
- II. Subjects clustered by broad area (Soc. Sci., Human., Sci.) and, where warranted by number of responses, in individual subject (Bus. Ad., Geog., Art, Music, etc.).

The response rate of this survey reached 51 percent in the first wave. No financial or clerical support was made available for a follow up. Total number of respondents equalled 140.

I hesitate to make inferences from this data due to the unknown non-respondents; however I do urge you to use the results, perhaps to suggest new review media to use in collection development work or to discard present sources you find to be marginal, or of little or no value. It is my hope that this data will aid the beginning bibliographer or the small, new academic library by giving an overview—based on the experience of others—on vehicles to book and material selection in collection development work in academic libraries.

Highlights

A. Small academic library; 13 respondents. 1. All use Library Journal and Choice (13). 2. 11 use blurbs, ads, etc. 3. Only % of the 13 use subject journals. B. Medium academic library; 68 respondents. 1. 56 use publisher's blurbs, ads, etc. 2. %9 use Library Journal; 16 use Choice. 3. %3 use subject journals. C. Large academic library; 59 respondents. 1. %9 use publisher's blurbs, ads, etc. 2. %4 use a variety of reviewing media ("Other"). 3. %3 use subject journals. 4. Only 23 use Library Journal; 19 use Choice. 5. 9 do not use reviews because: a. Approval plan brings in most current material. b. Reviews are too slow in appearing. II. Subject area. A. Social Science; 38 respondents. 1. 31 use publisher's blurbs, ads, etc. 2. 26 use Library Journal; 25 use Choice. 3. 25 use subject Journals. B. Humanities; 33 respondents. 1. 29 use publisher's blurbs, ads, etc. 2. 22 use subject Journals. C. Science; 25 respondents. 1. 23 use publisher's blurbs, ads, etc. 2. 21 use subject Journals; C. Science; 25 respondents. 1. 23 use publisher's blurbs, ads, etc. 2. 21 use subject Journals and Publisher's Weekly. D. Generalist; 20 respondents. 1. 16 use Library Journal and Publisher's Weekly. D. Generalist; 20 respondents. 1. 16 use Library Journal and publisher's blurbs, ads, etc. 2. 15 use Choice. 3. 10 use subject journals. Chaulation of frequency of use of selection tools; four most frequently checked responses: I. All types of academic library (Small, Medium, Large): A. Publisher's blurbs, ads, etc. 90 C. Library Journal 0. Choice 1. All subject areas (Social Science, Humanities, Science, Generalist): A. Publisher's blurbs, ads, etc. 91 G. Library Journal 10 Choice 11 All subject areas (Social Science, Humanities, Science, Generalist): A. Publisher's blurbs, ads, etc. 92 G. Library Journal 12 C. Library Journal 13 C.
